ABSTRACT

This is the first in a series of annual reports presenting information on the number of students who dropout of Nevada high schools. The report, covering the 1988-89 school year, is based on a count of dropouts, made each school year by the Nevada State Department of Education. Changes made in the student accounting regulations in January 1988 altered the classification of students who withdraw from school to include more reasons for withdrawal. Results indicate that during the 1988-89 school year: (1) 9.5% of (4,780) the state's high school students dropped out before the school year ended and did not show up in school the following year; (2) Hispanic (13.5%) and Black (12.1%) youth accounted for the largest percentage of dropouts, followed by American Indians (10.6%), Whites (9.0%), and Asians (6.3%); and (3) more girls (52.1%) than boys (47.9%) dropped out of high school. Two bar graphs and six tables provide enrollment and dropout data by school district, grade, race/ethnicity, sex, and reason for withdrawal. (TJH)

Introduction

This is the first in a series of annual reports that will present information on the number of students who dropout of Nevada high schools. The report is based on a count of dropouts made each school year by the Nevada Department of Education. The dropout count procedure was installed as one of the first actions taken in response to recommendations of a statewide Task Force on At-Risk Youth, which was commissioned by the State Superintendent of Public Instruction in the fall of 1986 to explore and address the needs of at-risk youth. The procedure is designed to obtain an accurate and reliable count of the number of students who drop out of Nevada high schools. Also, it is designed to correspond with procedures recommended by national education organizations which will standardize dropout statistics across the country.

Method

Student Coding

In January, 1988, changes were made in the pupil accounting regulations. The coding system in NAC 387.215 and 387.220 used by Nevada schools to classify students who withdraw from school was expanded to include more reasons for withdrawal. Table 1. shows the withdrawal codes (as defined in NAC 387.215 and NAC 387.220) that may be applied to a student upon withdrawal from school. Of the withdrawal codes listed in Table 1, codes 4; 5.a. through 5.j.; 6; 7; and Non-Returns denote students who are categorized as dropouts.

Dropout Count Procedure

The counting period was started with enrollment on the first day of school for the fall semester, 1988. A withdrawal code was recorded for any student who withdrew from school from the first day of fall semester, 1988, through the last day of spring semester, 1989 (or through summer school, 1989, for those schools that had such a program). In addition, a count was made of those students who completed the spring semester of 1988, but did not enroll in school by the apportionment count day of fall semester, 1989. These students were classified as non-returns for the grade which they completed in the spring semester, 1988. The withdrawal count period was kept open until December 1, 1989 to allow for the receipt of transcript requests for students who had withdrawn between the first day of school, fall semester, 1988 and the apportionment count day of fall semester, 1989. Upon request of a transcript, a student was recorded as a transfer to another school and was not counted as a dropout.

On December 1, 1989, a count of all withdrawals by sex, by ethnic status and by grade was made at each school that contained any of the grades eight

through twelve. Only those students who were classified as Non-Returns were counted for Grade 8. Simply stated, 8th grade students who do not return to 9th grade are counted in the 9th grade dropout statistics. The counts from each school within a school district were aggregated into a school district summary. The school district summary and individual school data were submitted to the Nevada Department of Education by December 15, 1989.

The dropout rate for each grade, 9 through 12, was computed as a percentage of the January 15, 1988, enrollment, as follows:

Dropout Rate Formula

$$\text{DROPOUT RATE} = \frac{[\text{\# of Dropouts}] + [\text{\# of Non-Returns previous year}]}{[\text{fall enrollment, 1988}] + [\text{\# of Non-Returns previous year}]}$$

EXAMPLE: Nevada Grade 9 Dropout Rate: (see Table 2)

$$(406 + 221)/(12{,}463 + 221) \times 100 = 4.9\%$$

Major Findings

1. In school year 1988-89, 4,780 of Nevada's high school students, 9.5 percent of the total high school enrollment, dropped out of school. Clark had 11.2 percent of its high school students drop out and Washoe, 7.3 percent. Of the smaller school districts, the dropout rate varied from 14.7 percent in Pershing County School District to 2.3 percent in Lincoln. (See Figure 1 and Table 2).
2. The Nevada dropout rate reflected the dropout rates of the two metropolitan school districts, Clark and Washoe, and increased as grade level increased. Of Nevada's high school dropouts, 4.9 percent of the ninth graders dropped out, 8.5 percent of the tenth graders, 11.7 percent of the eleventh graders and 13.1 percent of the twelfth graders. Nine of the 16 reporting school districts had their highest dropout rates in grade 12. Another four school districts had their highest dropout rates in grade 11. (See Figure 1 and Table 2).
3. Statewide, Hispanic (13.5%) and Black (12.1%) youth accounted for the largest percentage of dropouts followed by American Indians at 10.6 percent, whites at 9.0 percent and Asians at 6.3 percent. (See Table 3.A.). Figure 2 shows the minority dropout rate compared with whites by grade level.
4. Again, reflecting the trend in Clark and Washoe, Nevada's dropout rate for each ethnic group increased as grade level increased. As an example, the Nevada dropout rate for Hispanics and Blacks increased from 8.9 percent and 6.0 percent for ninth graders to 16.9 percent and 18.8 percent for twelfth graders, respectively. The percentage of

American Indians that were classified as dropouts increased from 4.9 percent in the ninth grade to 17.2 percent in the twelfth grade. (See Tables 3.A. through 3.E.).

5. Of those students who dropped out of school in 1988-89, more girls (52.1%) dropped out than boys (47.9%). A larger percentage of the female (10.5%) high school enrollment dropped out than did the male (9.1%) enrollment. (Table 4.).
6. Across all high school grades the greatest percentage of dropouts were those who were withdrawn from school by themselves, their parents or guardians. These students accounted for 34.4 percent of the dropouts in grade 9, 40.3 percent in grade 10, 38.9 percent in grade 11 and 40.4 percent in grade 12 and constituted the largest percentage of dropouts in 11 of the 16 reporting school districts. (See Table 4.).
7. Five rural school districts showed the greatest percentage of dropouts in "Category 6: Absence for 10 days; whereabouts unknown." Some 50 percent or greater of the dropouts in Elko, Lander, Lyon and Storey were coded in this category with Nye showing 47 percent.
8. The statewide grade 9 through 12 percentages of 23.7 percent for students coded as Non-Returns and 21.5 percent for students withdrawn by the school largely reflected percentages as they occurred in Clark and Washoe. In Clark, the percentage of students coded as non-returns was largest for the ninth graders (34.6%) while the percentage of students withdrawn by the school increased with grade level to 30.1 percent for eleventh graders and 28.6 percent for twelfth graders. In Washoe, the percentage of dropouts coded as non-returns was largest for the ninth graders (52.9%) while the percentage of dropouts withdrawn

by the school was highest in the eleventh (22.1%) and twelfth (18.4%) grades. (See Table 4.).

9. For those students who were withdrawn from school by themselves or a parent or guardian, the largest percentage (53.5% across grades 9 through 12) were students who indicated that they were going to transfer to another school. These students were recorded as dropouts when no request for a high school transcript was received from the receiving school. (See Table 5.).
10. When students who interrupted their progress were added with dropouts, the percentage of Nevada high school students who left school during the 1988-89 school year without continuing their program of education that year increased to 11.9 percent. Interrupted progress codes are used for some students who withdraw from the school program before the completion of the school year, but reenrolled in the same grade at the beginning of the next school year. As with the dropout percentage, the percentage of interrupted progress students plus dropouts increased as grade level increased, from 5.7 percent of the ninth graders to 16.2 percent for the twelfth graders. (See Table 6.).

Conclusion

This first report on the number and percentage of Nevada high school students who drop out of school during a given school year has produced a benchmark for the evaluation of trends in Nevada's dropout rate in future years.

The data indicate that one out of every ten of Nevada's high school students drop out of school before the school year ends and do not show up in school the following year. In agreement with other dropout studies, Nevada shows that the number of dropouts increase as the students move closer to graduation and that minorities are at a greater risk of dropping out than non-minority students (Barro & Kolstad, 1987; Rumberger, 1983; Steinberg, Blinde, & Chan, 1984).

Dropout rates are one of several education indicators that typically are presumed to index how effectively a school system's policy and programs allow students to successfully complete their education. Dropout comparisons that have been made in the past have been criticized because of the wide array of methods that have been used to compute the dropout rate thus making it difficult for policy makers to accurately assess the status of the dropout problem (Hammack, 1986; Wittebols, 1986). The results reported in this study were obtained from a dropout procedure that was developed using national guidelines for collection of state dropout statistics (Wittebols, 1986). This procedure will prove very useful in the future for the dual purposes of comparing Nevada's school district dropout statistics with each other and Nevada's statistics with that of other states.

The present results are not directly comparable to the results of another commonly used procedure which entails a calculation of a dropout rate based on a calculation of a four-year graduation rate. The four-year graduation rate is obtained by dividing the number of high school graduates in any given year into the ninth

grade enrollment four years earlier. The graduation rate percentage that is obtained is then subtracted from 100 percent and this yields the dropout rate percentage. It is this method that yields the 25 to 35 percent dropout figure that is so commonly reported by educators, policymakers and the news media. It should be noted that dropouts are not actually counted using this method and statistical corrections must be made for migration into and out of the system being measured.

The results generated by the one-year dropout method employed in this study can be used to yield a dropout rate comparable to that derived by the four-year graduation rate. One would add together the number of dropouts from counts made in successive grade levels in successive years beginning with some grade at some base year and then divide the total number of dropouts into the enrollment of the starting grade level at that base year. For example, one would add together the number of dropouts in grade 9 for school year 1988-89, the number of dropouts in grade 10 for school year 1989-90, the number of dropouts in grade 11 for school year 1990-91 and grade 12 for school year 1991-92. The sum of these four counts would then be divided into the ninth grade enrollment of school year 1988-89 and would yield a four-year dropout rate for the grade 9 class or cohort of school year 1988-89. This four-year dropout rate would most likely fall into the 25 to 35 percent range that is presently reported for the graduation rate method. Again, one would need to make statistical corrections for migration since students are not individually tracked throughout high school. Since this is Nevada's first year of data, such a four-year dropout rate could not be produced until the completion of the 1991-92 school year.

In summary, Nevada has developed and implemented a standardized dropout count procedure applied by all 17 school districts. Results show that in school year 1988-89 almost 10 percent of Nevada's high school students dropped out of school. This first year's data will serve as a benchmark for providing comparative statistics on the nature and scope of the dropout problem as it occurs in Nevada's 17 school districts and Nevada as a whole.

WITHDRAWAL CODES AS DEFINED IN NAC 387.215 AND 387.220:

1. TRANSFER OF PUPIL: ANOTHER SCHOOL IN COUNTY.
2. TRANSFER OF PUPIL: ANOTHER SCHOOL IN STATE.
3. TRANSFER OF PUPIL: ANOTHER SCHOOL IN ANOTHER STATE.

* 4. WITHDRAWAL OF PUPIL AT REQUEST OF SCHOOL.
* 5. WITHDRAWAL OF PUPIL BY PUPIL, PARENT, GUARDIAN:
   A. FAILING GRADES IN 2 OR MORE CLASSES.
   B. PREGNANCY.
   C. MARRIAGE.
   D. EMPLOYMENT.
   E. PHYSICAL, MENTAL, ATTITUDE: CERTIFICATE FROM PHYSICIAN (NRS 392.050).
   F. AUTHORIZED BY JUVENILE DIVISION OF DISTRICT COURT (NRS 392.090).
   G. SELF-SUPPORT OR SUPPORT OF PARENT (NRS 392.100).
   H. APPRENTICESHIP IN ACCORDANCE WITH NRS 392.110.
   I. OTHER REASON NOT SPECIFIED IN A. THROUGH H. AND IN J.
   J. NO RECEIPT OF REQUEST FOR TRANSCRIPTS.
* 6. ABSENCE OF 10 CONSECUTIVE DAYS: WHEREABOUTS UNKNOWN.
* 7. INCARCERATION.

8. WITHDRAWAL PURSUANT TO NRS 392.060, 392.070 OR 392.080.
9. DEATH OF STUDENT.
10. A. ANY OTHER REASON FOR WITHDRAWAL.
    B. INTERRUPTED PROGRESS: STUDENTS WHO WITHDRAW DURING SCHOOL YEAR BUT WHO ARE ENROLLED BY COUNT DAY OF THE FOLLOWING SCHOOL YEAR.

* NON-RETURN (REFER TO NAC 387.220)
WITHDRAWAL OF STUDENT WHO WAS ENROLLED IN GRADES 8 THROUGH 12, INCLUSIVE, IN THE SCHOOL DISTRICT AT END OF PREVIOUS SCHOOL YEAR BUT DID NOT COMPLETE INSTRUCTIONAL PROGRAM, TRANSFER, WITHDRAW OR REENROLL AND DID NOT RETURN TO SCHOOL BY DECEMBER 1, OF THE CURRENT SCHOOL YEAR.

* NOTE: CODES 4,5,6,7 AND NON-RETURNS DEFINE DROPOUTS.
